ABOUT ARIS

Since its inception in 2010, Triple-S Technology has consistently delivered premium quality yet cost-effective lighting solutions to the market. Our product portfolio has undergone continuous refinement and innovation, with each passing year witnessing the introduction of superior and captivating offerings.

Our extensive range of high-performance products encompasses LED Downlights, LED Track Lights, highly customizable strip lights and aluminium profiles, Bluetooth-enabled luminaires, and an advanced control system with a user-friendly mobile app interface among other. We remain dedicated to serving our valued customers in the Southeast Asia region with dedicated commitment.

Through unwavering dedication and tireless effort, we are steadfast in our pursuit of excellence, striving relentlessly to guarantee the utmost satisfaction of our esteemed clientele.

ARIS STRETCHED FABRIC

Aris Stretched Fabric represents fusion of innovative stretched ceiling technology and LED lighting solutions. This remarkable combination, all while preserving the elegance of your interior ambiance. Distinguished by its rapid installation and minimal upkeep demands, Aris Fabric epitomizes both efficiency and practicality in one seamless package.

WHAT IS STRETCHED FABRIC

Smart Fabric is an innovative suspended fabric technology. It consists of two elements, the tension holder and (Profile) the fabric. The fabric is made of light Polyvinyl Chloride (PVC) membrane that becomes very smooth when stretched. It can be used for ceilings, walls, panels, light diffusers and other creative applications such as multi-level ceiling, arched or dome shaped installation.

STRETCH FABRIC SERIES

4011 TRANSLUCENT WHITE B2
95% transparent (clear) 25-50% eyelet

4011 TRANSLUCENT WHITE UV-PRINT
UV-printed translucent fabric

9015 TRANSLUCENT BLACK B2
40-62% translucency

9015 TRANSLUCENT BLACK UV-PRINT
UV-printed translucent fabric

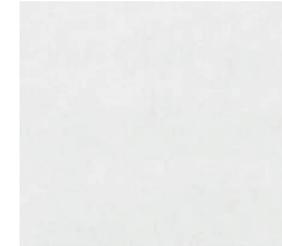

FIBERGLASS A1 - FIRE-RATED
Class A1 non-combustible—the highest international fire safety rating.

FIBERGLASS A1 UV-PRINT
Class A1 non-combustible material—the highest international fire safety standard—featuring a specialized surface coating optimized for UV printing.

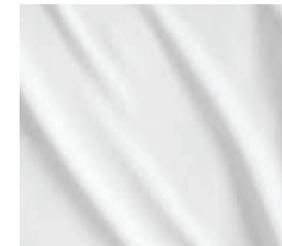

STRETCH FABRIC SERIES

CALIPSO B2
Exceptional smooth and ultra-soft light diffusion.

CALIPSO UV-PRINT
Exceptional soft-focus light distribution featuring a UV-print-ready surface finish.

MATT
Ultra-matte finish: Low glare and reflection-free for optimal eye comfort.
